**3d Metric
Trading
System**

A Compelling Solution

- A new **Generic** Forecasting Method
 - Any complex system
 - Financial Data
 - Climate Data
 - Business Intelligence
 - Any time interval
 - Hourly input produces hourly output
 - Monthly input produces monthly output
 - Yearly input produces yearly output

- Extensive Testing
 - 4 Portfolios: UK and US
 - 5 Time Intervals: Intraday, Daily, 1, 2, 4 Weeks
 - 2 Test Criteria
 - Numerical Accuracy
 - Correctness of Trend
 - Overall Averages: **71.1** and **72.8%**
- Improved 'Engine' Code
- New 'Trading Measures'

Validations

- Richard Brook
 - E-Synergy
- Jeremy Renwick
 - Trading with profit
- Nik Wislang
 - Senior Developer at GLG Partners
 - Forecasting Engine: from Visual Basic to C#
 - ‘Tweak Parameters’: adjusting to data
- Prof. Dr. Algirdas Pakstas
 - London Metropolitan University
 - Department for Mathematics, Computing & Communications Technology
 - £6000 grant from London Development Agency
 - to build a Multi-Purpose Station

Path to Exit

- The **Ethical Investment Network** is designed to
 - produce returns of the money that clients invest
 - provide funding for social businesses and charitable projects
 - influence capitalistic banking practices by setting positive examples.
- It is hoped that anybody's financial, intellectual and influential capital will prefer nurturing long term developments instead of exiting.

The Company

- Smart Knowledge Management Ltd was registered in May 2004
- I am the only director
- After having registered 3D Metrics with other directors and dissolved it, I am trading as '3D Metrics'.
